

## BLUE DUSKY

### Male

*Head and Neck* Brown charcoal, changing to claret for the lower neck and upper breast. Eyes brown. Bill: slate green.

*Back* Dark blue dun tinged with brown, darker towards the rump.

*Breast* Lower neck, breast and shoulders claret. Lower breast: blue grey with brown peppering.

*Flanks & Underbody* Flanks blue grey peppered with brown.

*Tail* Dark blue dun; brown tinge to outer edges.

*Wings* Primaries honey dun with blue dun on the leading edge. Secondaries dark blue dun with brown tinge. Coverts honey dun edged with brown. Scapulars dark blue dun edged with claret. Darker outer feathers with more claret.

*Legs & Webs* Dark tan

### Female

*Head and neck* Head warm ginger fawn, each feather is marked with brown charcoal graining. No eye stripes. Eyes: Brown. Bill: Dark slate with dark bean. Neck warm ginger.

*Back* Warm ginger with slight blue grey central pencilling.

*Breast* The lower part of the neck and neck expansion is a shade warmer than the head and upper neck, little evidence of pencilling.

*Flanks & Underbody* Ginger.

*Tail* Outer webs ginger; inner webs blue ginger.

*Wings* Secondaries blue dun. Primaries a shade lighter, and more brown on the leading edges. Scapulars deep ginger with bluish centres. Tertiaries a shade lighter with blue grey speckling. Coverts blue dun edged with ginger.

*Legs & Webs* Dark tan.

### Disqualifications

*Male* Lack of claret breast colour. Presence of neck ring.

*Female* Presence of eyebrows or eye stripes.

*Both* White body or wing feathers.

### Major Defects

*Both* Orange or yellow bill. Bright orange feet or legs.
